

NAME:

Canada is a multicultural country. As we will be learning in Social Studies, it is made up of different people that have **immigrated** (country coming to live) to Canada from many different places around the world.

**Investigate ~ Your Task:** Discuss with family members, relatives, and other important people at home and try to find out where your family **emigrated** (country leaving) from.

*This is will most likely be a particular country or countries and could be many or only a few! Use a piece of paper or sticky note to jot down some basics (this is just the starting point so it should be brief).*
